RE: Westbrook Pedestrian Overpass project construction update

To whom it may concern,

Work continues on the Westbrook Pedestrian Bridge Replacement project. Currently crews are focused on the construction of ramps and stairs on both sides of Bow Trail. Concrete for the east ramp is expected to be poured in June, weather permitting. Crews will then shift their focus to construction of the west ramp. The contractor is currently targeting late August for installation of the main bridge span.

Members of the public are reminded to exercise caution, follow detour signage and remain aware of potential hazards when travelling near construction sites. Drivers using Bow Trail are advised to watch for temporary lane closures and to follow posted traffic signage while passing through the construction area. The construction team would like to express thanks to the public for showing patience during this phase of construction.

For more information related to this project, visit Calgary.ca and search 'Westbrook Overpass.'
